Emmanuel Ayo

NETWORK SECURITY ENGINEER

Atlanta, GA • (770) 688-0775 • ea100.pro@gmail.com • linkedin.com/in/eayo100

SUMMARY

Network Security Engineer with 6+ years across enterprise network and security operations, specializing in firewall policy, network segmentation, and least-privilege access control at global scale. Hands-on across Palo Alto/Panorama, Cisco ASA/FTD & Firepower, and Azure Firewall, with AlgoSec, Splunk, and ServiceNow, supporting 1,000+ enterprise services at a global automaker. M.S. in Information Technology; CySA+ and Security+ certified, CISSP exam scheduled.

CERTIFICATIONS

Certified: CompTIA Cybersecurity Analyst – CySA+ (CS0-004) • CompTIA Security+ (SY0-701) • Microsoft Azure Fundamentals (AZ-900)
In Progress: (ISC)² CISSP — exam scheduled

TECHNICAL SKILLS

Network Security: Firewall policy & rule lifecycle (ACLs, NAT, object groups), network segmentation, least-privilege / zero-trust, IPS/IDS tuning, audit & compliance attestation
Firewall & Security Platforms: Palo Alto / Panorama, Cisco ASA/FTD & Firepower (FMC/CSM), Azure Firewall, AlgoSec FireFlow, Splunk, LiveNX, Wireshark, ServiceNow, Infoblox (DDI)
Networking: BGP, OSPF, EIGRP, DNS/DHCP/IPAM, VPN/IPsec, MPLS, STP, VLANs, Cisco Nexus/FEX, F5 load balancing, TACACS
Cloud & Automation: Azure, AWS, Python, REST APIs
Systems: Windows Server, Active Directory, Linux

PROFESSIONAL EXPERIENCE

General Motors
Oct 2024 – Jan 2026

Network Security Engineer, Global Network Security — Atlanta, GA

- Engineered and validated firewall policy changes across Production, DMZ, and Cloud — Palo Alto/Panorama, Cisco ASA/FTD & Firepower, and Azure Firewall — for 1,000+ enterprise services including connected-vehicle (OnStar) infrastructure, at near-zero downtime.
- Optimized 50+ firewall rules weekly (ACLs, NAT, object groups), enforcing segmentation and least-privilege controls to reduce enterprise risk.
- Tuned and maintained IPS/IDS inspection on Cisco Firepower/FTD — rule profiling, oversubscription remediation, and inspection-policy enforcement — sustaining threat prevention without degrading throughput.
- Managed the full firewall rule lifecycle (creation, modification, decommission, compliance attestation) via AlgoSec FireFlow and ServiceNow, ensuring audit readiness and least-privilege enforcement.
- Partnered with application owners to translate business requirements into firewall logic, accelerating approval SLAs while tightening access-control posture.
- Detected and mitigated network anomalies with Splunk and LiveNX (misrouted traffic, stale NAT/ARP), and supported incident response across global connectivity.

General Motors
Jun 2022 – Oct 2024

Network Engineer, Core Production Health — Atlanta, GA

- Triaged and resolved 10–20+ weekly network/security incidents across firewall, proxy, and load-balancing layers via ServiceNow change/incident records and scheduled device blackouts; monitored health via BGP and telemetry across HA environments with 1,000+ endpoints.
- Automated network operations with Python and REST APIs, reducing manual configuration errors and improving control consistency across environments.
- Administered Infoblox (DDI: DNS, DHCP, IPAM) across large-scale segmented networks; performed deep packet analysis and top-talker/PCAP investigation (Wireshark) to accelerate root-cause identification.

Aston Technologies
Jul 2021 – Dec 2021

Junior Network Engineer (Contract) — Minneapolis, MN

- Deployed 10+ enterprise networks (OSPF, EIGRP, BGP, VLANs); built Cisco labs to validate CCNA/CCNP-level technologies and supported vendor evaluation and compliance efforts.

TES-AMM USA
Apr 2019 – Apr 2021

IT Support Specialist — Atlanta, GA / Los Angeles, CA

- Built AWS-based diagnostics for shipped hardware at scale — pulled logs from S3, spun up Linux EC2 instances for environment replication, and monitored 200+ remote endpoints via CloudWatch with automated fault alerting.
- Administered Windows Server and Active Directory, enforcing access controls for critical SCADA/GIS infrastructure; led IT compliance audits and ran security best-practice workshops for 40+ staff.

EDUCATION

Kennesaw State University — M.S., Information Technology (Data Analytics) — May 2023
The University of Georgia — B.S., Biology & Data Science — May 2019

HIGHLIGHTS

KSU Computing Showcase Grand Prize (2023) — AI/ML quantitative-trading capstone (Python, scikit-learn) • UGA Best Programmer — 1st of 900 contestants • APWA Georgia Scholarship Recipient
